The characteristic length, tortuosity and constriction factor are direction dependent descriptors of the pore structure, and an anisotropic permeability behaviour of powder compacts is not uncommon [69 – 72]. As discussed above, dissolution might occur simultaneously with disintegration, though in the majority of cases one refers to the dissolution after the disintegration. These tears moisten the corrupted hand he presses to his mouth.

However, many researchers continue to agree with Cannon and Bard that the exp As discussed above, dissolution might occur simultaneously with disintegration, though in the majority of cases one refers to the dissolution after the disintegration. For this reason it is commonly referred to as the "reptilian brain". Liberating the Unconscious for Breakthrough Insights. It is the essence of who you are. Dynamics of wet granular matter. Since the permeability is also a function of the pore radius, it decreases over time as .
